Bald Knob Farm
Bald Knob
Private

1910's

This two and one-half story farmhouse is three bays wide and two bays deep. The house and a springhouse are constructed of glazed building tiles which were manufactured in Mount Savage between 1912 and 1920. The buildings were erected for George C. Brailier during the second decade of the 20th century.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Bald Knob Farm is located west of Bald Knob Road near Mount Savage. The rectangular dwelling is two and one-half stories tall and three bays wide on the southern facade. The house is situated on a steep slope so that three and one-half stories are exposed on the facade. Wall construction is of hollow glazed building tile laid in a stretcher pattern. The hipped roof is covered with diamond-shaped asphalt shingles and has snowbirds. Eaves consist of a boxed cornice, soffit, bed mould and a frieze. The building rests on a high foundation of random ashlar stone.

Porches on the facade and the northern elevation have hipped roofs supported by tapered square wooden columns. Windows are 2/2 sashes which are shuttered on all elevations other than the facade. Entrances located in the centers of the facade and the northern elevation include one light transoms and doors of one rectangular light with beveled glass bordered with egg and dart moulding. Two chimneys of white glazed brick with corbeled caps are located inside and on the eastern and western elevations hip roofed dormers on the facade and northern elevation have four light windows.

The first floor of the farmhouse is divided into two rooms, a parlor and a kitchen. Walls are covered with wooden paneling with a high baseboard. Interior doors are of five panels with pedimented transoms. Windows have pedimented interior surrounds. A one flight stairway in the center of the house has rectangular capped newels plain balusters and string, and pendants in the open well.

A springhouse east of the farmhouse is a one story, two bay rectangular structure constructed of the same building tile as the farmhouse. It has a hipped gable roof and rests on a high stone foundation. Windows are 2/2 sashes and the only entrance is a wide diagonal board door offset on the western elevation.

A saltbox barn southwest of the farmhouse is of frame construction with vertical board siding. The roof is gabled. It rests on a high foundation of coursed ashlar and rubble stone with cinderblocks on the southern elevation. Sliding doors on the northern elevation slide open on metal runners. Trefoil-shaped vents are in the gables of the eastern and western elevations of the barn. A flat roofed cinderblock addition and a metal silo abut the southeastern corner of the barn.

STATEMENT OF SIGNIFICANCE

The Bald Knob Farm, also known as the Brailer Farm, is on Bald Knob north of Mount Savage. The Brailer family was among the original settlers of the Mount Savage area. (Scharf p. 1496) The family owned coal mines in the neighborhood which were opened by the George's Creek and Bald Knob Coal Company in 1903-1904. In 1916 the Brailer family, acting as the Brailer Mining Company opened the "Bald Knob Mine." The coal underlying Bald Knob is "Big Vein" coal-a vein of high quality coal.

The house and springhouse on the farm were built for George C. Brailer during the second decade of the 20th century. (tax assessments) These buildings are made of glazed building tiles, a product which was manufactured in Mount Savage between 1912 and 1920. (Interview) The vertical board barn predates the house.
